

“Get a Breath of Fresh Air this summer”

MAN Bristol is pleased to be able to offer your business the additional benefit of our fully equipped **Air-Conditioning Services** with our highly trained technicians for all your vehicle Air Conditioning needs.

Around 80% of vehicles are fitted with air conditioning as standard; the manufacturer's recommendation is that these air conditioners are serviced at least every 2 years. This involves recovery of the old refrigerant, replace receiver drier, check system for leaks, recharge with new refrigerant and lubricating oil. All this can now be done as part of your routine service at an interval that best suits your business demands.

Make sure you can stand the heat this summer and call now to book your vehicle in.
